

RUPAL SONI

Udaipur, Rajasthan

+91-9351813445 | rupalsoni518@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

DevOps Engineer with 2+ years of experience in building and automating scalable cloud infrastructure. Skilled in **AWS, Kubernetes, Terraform, and GitHub Actions**, with hands-on expertise in CI/CD, monitoring, and security best practices. Proven track record of reducing deployment effort by **70–80%**, improving system reliability, and implementing secure, production-grade DevOps solutions.

Experience

SparkEighteen Pvt. Ltd.

Jul 2024 – Present

DevOps Engineer

Udaipur, India

- **HealthTech – Glide:** Built and maintained CI/CD pipelines using **GitHub Actions** for a SaaS-based healthcare claims system across **preprod, stage, demo, and prod** environments. Automated provisioning using **Ansible**, and implemented centralized observability using **Grafana, Loki, and CloudWatch**. Reduced deployment effort by **70–80%** and minimized production incidents through proactive monitoring.
- **Identity & Security – ScrambleID:** Implemented secure CI/CD pipelines using **GitHub Actions with AWS OIDC**, eliminating long-lived AWS keys. Designed automated **disaster recovery and failover workflows**, and integrated real-time alerting for pipeline failures. Improved deployment security, reliability, and reduced manual intervention during outages.
- **VC / Startup Platform:** Designed and deployed scalable AWS infrastructure using **Terraform** and **EKS**. Implemented automated CI/CD pipelines, cluster autoscaling with **Karpenter**, and centralized monitoring with **Grafana & Loki**. Improved infrastructure scalability and reliability by **60%+** and streamlined deal-flow platform operations.
- Designed and maintained secure **CI/CD pipelines**, improving deployment speed and consistency across environments.
- Automated infrastructure provisioning and configuration management using **Terraform and Ansible**, reducing configuration drift.
- Implemented centralized logging, monitoring, and alerting systems to reduce MTTR and improve observability.
- Developed automated backup and recovery workflows, improving system resilience and disaster recovery readiness.
- Collaborated with cross-functional teams to troubleshoot and stabilize production deployments.

Grras Solution Pvt. Ltd.

Mar 2024 – July 2024

DevOps Intern

Udaipur, India

- Worked on Docker-based deployments on AWS EC2 and implemented CI/CD pipelines using **Jenkins and GitHub Actions**.
- Set up monitoring using **Grafana, Loki, and Promtail** for log aggregation and observability.
- Assisted in Infrastructure as Code using **Terraform and CloudFormation**.
- Configured automated backups to **Amazon S3** with lifecycle management.

Technical Skills

Cloud Platforms: AWS, Azure

Containerization & Orchestration: Docker, Kubernetes, Helm, Karpenter

IaC & Automation: Terraform, Terragrunt, Ansible, AWS CDK

CI/CD: GitHub Actions, Jenkins, Azure DevOps, Codepipeline

Monitoring & Logging: Prometheus, Grafana, Loki, ELK Stack

Backup & Recovery: Velero, AWS Backup, S3 Versioning

Databases: PostgreSQL, MySQL, MongoDB

Programming/Scripting: Python, Bash

Version Control: Git, GitHub

Networking: Linux

Projects

Multi-Environment CI/CD Automation (HealthTech Platform): Designed and implemented **GitHub Actions** for a healthcare SaaS system across **preprod, stage, demo, and prod**. Integrated environment variable synchronization, automated deployments, and health checks, reducing manual effort by **70–80%** and ensuring consistent releases.

Secure CI/CD with AWS OIDC (ScrambleID): Built a **keyless authentication system** by integrating GitHub Actions with **AWS OIDC**, eliminating static credentials. Implemented automated failover workflows, alerting mechanisms, and pipeline monitoring to enhance security and reduce deployment failures.

Scalable AWS Infrastructure with EKS & Terraform: Developed a production-grade infrastructure using **Terraform** and deployed applications on **EKS** with **Karpenter autoscaling**. Integrated **Grafana & Loki** for observability, improving system scalability and reliability by **60%+**.

Centralized Monitoring & Logging Platform: Built a unified observability stack using **Grafana, Loki, Promtail, and CloudWatch** for real-time log aggregation and alerting. Reduced **MTTR by 40%** and enabled proactive incident detection.

Automated Backup & Disaster Recovery System: Implemented automated database backups using **Ansible** and **AWS S3** with lifecycle policies. Designed recovery workflows and periodic validation checks to ensure data reliability and disaster readiness.

Certifications

RHCSA Certified – Red Hat

Terraform Associate Certified (004)

NPTEL – Data Structures and Algorithms

Education

Techno India NJR Institute of Technology <i>B.Tech, Computer Science and Engineering — CGPA: 9.40</i>	2021 – 2025 <i>Udaipur, India</i>
Central Academy Sr. Sec. School <i>Science (Mathematics) — 82%</i>	2020 – 2021 <i>Udaipur, India</i>
